PROFILE SUMMARY

Web & mobile developer and second-year Computer Science student at BIT. I build products with React/TypeScript, Flutter and Python/Node.js, with a strong interest in applied AI and cybersecurity. I recently completed a developer internship at WoeLab/HubCity in Lomé, contributing to the audit, documentation and MVP consolidation of SCoPE.

EDUCATION

2nd Year in Computer Science — Programming & Entrepreneurship Option

Burkina Institute of Technology (BIT), Koudougou

(Oct 2024 – Present)

CS27 Cohort — Class Delegate.

Relevant courses: algorithms and data structures, web & mobile development, databases, object-oriented programming, software engineering, technological entrepreneurship.

PROJECTS

AgroConnect BF — B2B Agricultural Platform Academic Project (BIT) · Lead Dev · 2026

- Architected a multi-platform B2B platform (web React/Vite, mobile Flutter, Node.js/Express API) connecting farmers, buyers, and transporters, unified by a common design system.
- Led a web team of 5 developers: divided spaces by business role, implemented JWT authentication and role management, conducted code reviews, and integrated into a cohesive product.

Zamsma — Educational Mobile Game (Chemistry) Grandes Écoles Hackathon 2026 · Team Mirror

- Offline-first chemistry mobile game (Flutter: BLoC, Hive) based on Bloom's taxonomy, with a containerized Django 5 / DRF backend (PostgreSQL, Redis) and a local network challenge mode — ranked 15th out of ~40 teams at HGE 2026.

GymX v2 — Gym Management SaaS Personal Project · React 19 / TypeScript / Supabase · 2026

- Designed a real-time booking SaaS: capacity control and anti-duplicate lock ensuring slot integrity in concurrent access.
- Implemented Row Level Security (Supabase RLS) and Role-Based Access Control (RBAC), a complete CRUD back-office, analytical dashboards (Recharts), and a bilingual FR/EN interface.

SKILLS

Technical Skills: React 19, TypeScript, Next.js, Tailwind CSS, Flutter/Dart, Node.js/Express, NestJS, PostgreSQL/Supabase, REST API, JWT, Git/GitHub, Python (Django/DRF), MongoDB, Docker, Vite, Vercel, Figma, AI integration (Gemini, MCP)

Familiar with: Vue.js, FastAPI, Flask

Soft skills: teamwork, communication, leadership (Lead Dev), project management, autonomy

PROFESSIONAL EXPERIENCE

Web & Mobile Developer Intern — WoeLab / HubCity Africa

Lomé, Togo · AIESEC Global Talent · Aug – Sep 2026

- Audited and documented three SCoPE codebases: Flutter web, Flutter mobile and NestJS backend.
- Contributed to the administration dashboard, MVP consolidation, testing, Git workflows and technical handoff.
- Stage ended on 26 September 2026; full deployment and final staff validation were still pending at closure.

Developer & Digital Product Creator — Freelance Independent

(Jan 2026 – Present)

- Structured a freelance service offering in web, mobile (offline-first), and backend/API development: defining service positioning, drafting descriptions, and setting up an international payment circuit.

CERTIFICATIONS

- Introduction to Critical Infrastructure Protection (ICIP) — May 2026 · OPSWAT Academy
- Introduction to Model Context Protocol (MCP) — Apr. 2026 · Anthropic Academy
- AI Fluency for Students — Apr. 2026 · Anthropic Academy

- Google Project Management — modules Foundations & Project Initiation — 2025 · Google Career Certificates (Coursera)

LANGUAGES

French (Native) | Dioula (Native) | English (Intermediate)

EXTRACURRICULAR ACTIVITIES

- Grandes Écoles Hackathon (HGE) 2026 — Team Mirror
- HUAWEI ICT Competition — Network track, national rounds (2025-2026)
- Cybersecurity Hackathon — Merradis Academy (2025-2026)
